

Welding electrode holder

1	Welding electrode holder fully insulated for rated current 600-1000 amp
2	Made of brass / copper body for high conductivity
3	Electrode holder is suitable for electrode diameter 2.4 mm to 6.30 mm
4	Electrode holder jaw-open type
5	Maximum distance between the handle (Lower portion) and lever (Top surface)
	shall be 85 mm maximum
6	weight of electrode holder - maximum 600 grams
7	Electrode holder has ball point connection for clamping welding cable
8	These meet the requirements of ISO:2009,ISO:10380:2012 & KS:731
